WHAT? an exciting learning opportunity for your child... "THE RGS SUMMER SOLUTION"

WHO? Children entering Kindergarten – 6th grade who love to learn and be creative!

WHERE? Rio Grande School of course!

WHEN? Session 1 running from June 13-July 1. Session 2 running from July 25-August 12. Monday-Friday, 9am-3pm with Full day, Morning and Afternoon options. Complementary extended care to 5pm.

HOW? Children, grouped according to their ages and interests, will rotate among a variety of enriching activities offered by enthusiastic, experienced teachers in a safe, supportive environment. Each week a different fun-filled theme is offered. A snack and recess breaks are provided. Full-day and afternoon campers should bring their own lunch.

WHY? Because these classes are too exciting to miss!

SUMMER SOLUTIONS THEMES 2011

WHAT'S NEW?

Two Sessions, Same Great Experience!

In an effort to expand our offerings, and serve families throughout the summer, Summer Solution has grown to two excellent sessions.

Session 1 – June 13–July 1

Our first session is filled with themes that will invigorate the imagination and inspire any young artist. With the help of RGS Art Specialist Melissa Merritt, children can discover their boundless creativity. Appealing art experiences will be complemented by games, songs, and fun activities led by experienced RGS faculty.

Session 2 – July 25–August 12

Our second session has all the exciting theme-based activities meshed with a focus on hands-on experience and scientific inquiry. For our first week, we are privileged to have the vast knowledge of RGS Experiential Education Specialist Stuart Pendleton to lead discovery activities in building and robotics. Our second and third weeks will continue the excitement of the first as we explore how to build a healthy garden and discover the joys of chemistry with everyday ingredients.

JUNE 13-17 RIO GRANDE IN WONDERLAND

Jump down the rabbit hole for a fantastical week following Alice through Wonderland. Become a Mad Hatter, go through the looking glass, and celebrate your unbirthday! Practice your croquet skills and even paint some roses red. Nothing is impossible in Wonderland! This week will leave you smiling like the Cheshire Cat.

JUNE 20-24 SWASHBUCKLERS ON THE HIGH SEAS

Land ho! Come explore a tropical paradise complete with palm trees, beaches, and lots of sunshine. But beware, there are pirates lurking in the forest, and they're in search of buried treasure and prisoners to walk the plank on their ship. If you dare, join us on this magical journey to see if you can outsmart those pirates and come away with the treasure!

JUNE 27-JULY 1 JUNE JAMBOREE

The month may have changed, but our annual jamboree is exciting as ever! This week is all about celebrating summer with cool treats, fun games, and lots of great times in the water. We always have a few special surprises in store, so be on your toes. It's guaranteed to be a slam-dunk!

Dear Families,

We at RGS can't wait to bring you our Summer Solution for 2011. By expanding to six weeks and splitting our camp into two sessions at the beginning and end of summer, we hope to add variety to our offerings and serve a greater selection of families. Last year we introduced an extended day option for our families. Due to the popularity of this service, we will continue to offer this option for all weeks. Because of the creativity brought about by the integration of art enrichment last summer, we knew Stuart Pendleton's expertise would be a perfect addition to our scientifically-minded second session, and we're thrilled to have him on board. You can be confident that your child will experience summer fun in a familiar place with a great group of educators and children. Put simply, you can't go wrong with any weeks you choose this summer.

Sign up while spots are still available!

We look forward to seeing you in June!

Sincerely,
Neal Turnquist
RGS Summer Program Director

JULY 25-29 KIDS CONSTRUCTION ZONE

If you like to build, then grab your hard hat, because this is the week for you. We'll combine the best of endless natural building materials we can find nearby with elaborate constructions using all your favorite building materials. Start compiling your blueprints, because you'll only be limited by your imagination!

AUGUST 1-5 FROM THE GROUND UP

Join us for a botanical bonanza! We'll spend this week getting our hands dirty and sprouting new life as we learn about the art and science behind a successful garden. This week will be a blast whether you're a beginner or have a skillfully developed green thumb. Inch by inch, row by row, you'll be amazed at how much we can grow!

AUGUST 8-12 GOOEY, STICKY, YUMMY

Why is making a mess so much fun? Come find out as we celebrate our final week of camp in goopy fashion! Create chaos in the kitchen and taste your original recipes. Experiment with everyday materials to invent concoctions the world has never seen. Don't forget your swimsuit and maybe a change of clothes. It's going to get sticky!
